PROFESSIONAL SUMMARY

Software Engineering Intern candidate (Final year, B.Tech, graduating 2027) with strong fundamentals in **Data Structures, Algorithms, and Software Design**. Experienced in building **scalable backend applications, microservices, event-driven systems**, and **AI-powered solutions** using **Java, Python, and JavaScript**, with knowledge of **artificial intelligence, machine learning, databases, and networking**. Designed and implemented production-grade systems serving real users across web and cloud platforms, with experience in **performance optimization, reliability, and debugging**. CGPA: 7.60. 300+ DSA problems solved with a 120+ day streak.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+), TypeScript, Dart, SQL, Bash

Backend Frameworks & Web Architectures: Spring Boot, Node.js, Express.js, FastAPI, REST APIs, Microservices, SOA, API Gateways

Frontend & Mobile: React.js, Next.js, Flutter, Tailwind CSS

CS Fundamentals: Data Structures, Algorithms, OOP, Software Design, LLD, HLD, Design Patterns, Networking Fundamentals

AI/ML & Data: Artificial Intelligence, Machine Learning, LLMs, RAG Pipelines, LangChain, FAISS (Vector DB), TensorFlow, Scikit-learn, Data Mining, Pandas

Databases & Infrastructure: PostgreSQL, MongoDB, MySQL, Indexing, Query Optimization, Systems Data Analysis, JPA/Hibernate

Cloud & Tools: AWS (EC2, Amplify, CloudWatch), Docker, Git, GitHub, CI/CD, Maven, Swagger, Debugging & Visualization Tools

WORK EXPERIENCE

Freelance Software Developer — MLM Microservices Platform

Node.js, Express.js, MongoDB, Docker, JWT, API Gateway, Microservices

[GitHub](#) | [Live](#)

May – Jun 2025

- Architected and maintained a production MLM platform with 100+ active users, implementing Wallet, Income, and Admin microservices with API Gateway-based routing and JWT authentication.
- Designed an asynchronous system integration proxying request parameters from an API Gateway to decoupled business layers to automate downstream transactional ledgers.
- Engineered a binary tree user placement engine via dynamic parent-child link configurations, ensuring validation processing and algorithmic sponsor spillover routing.
- Implemented stateless JWT authentication paired with custom middleware layers, isolating administrative routes and enforcing RBAC controls for data operations.

Freelance Frontend Developer — Madarsa Arabia Educational Platform

React.js, Next.js, Tailwind CSS, i18n, AWS Amplify, Git

[GitHub](#) | [Live](#)

Aug 2025

- Developed and deployed a multilingual educational platform for a freelance client using React.js and i18n, serving 300+ active students and administrators through a responsive web application.
- Implemented dynamic notice/announcement workflows and WhatsApp Click-to-Chat integration; optimized frontend performance and AWS Amplify deployment — leading independently from requirements to deployment.
- Leveraged Vite and accessible Radix UI primitives alongside Framer Motion to craft fluid, highly structured user layout pages based on Figma UI designs.
- Integrated structured JSON fallback data stores alongside contextual state layers to preserve platform operations under unstable or offline deployment environments.

PROJECTS

AI-Driven Decision Intelligence Platform

Python, FastAPI, LangChain, FAISS, RAG, Mistral-7B, SHAP, Celery, PostgreSQL, React.js, AWS EC2, Firebase

[GitHub](#)

- Designed and implemented an AI/ML-integrated analytics platform with a RAG pipeline (LangChain + FAISS vector DB) for data intelligence — built a scalable FastAPI backend capable of supporting high-volume AI-assisted query workloads.
- Engineered hybrid LLM architecture (Mistral-7B + Qwen2.5-Coder) applying artificial intelligence and machine learning techniques; optimized code inference and context parsing via explicit multi-switch engine configurations.
- Orchestrated flexible runtime execution logic across Groq, remote endpoints, and local GPU configurations, allowing customizable system scaling tailored to computing constraints.

Freelance – Gramflix | Referral & Wallet System

Java, Spring Boot, React.js, Next.js, MongoDB, Docker, JWT, Spring Security, JPA, AWS EC2, AWS Amplify

[GitHub](#)

- Designed a high-performance, layered Java application — processed referral and wallet transactions efficiently through optimized database queries and indexing strategies, leveraging Spring abstraction for clean data layer isolation.
- Integrated Spring Security RBAC and secure JWT-based authentication middleware to orchestrate a secure, multi-tier premium approval workflow alongside transactional status-tracking features.

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL IIT Kharagpur – Java** | [Elite Link](#) | **NPTEL IIT Madras – Database Systems** | [Link](#)
- JPMorgan Chase & Co. – Software Engineering Virtual Experience (Forage)** | [Link](#) | **AI-ML Virtual Internship – AICTE EduSkills & AWS Academy** | [Link](#)
- 300+ problems on LeetCode & GFG** — DSA, DP, Graphs, Trees | **120+ day streak**

EDUCATION

JIS College of Engineering – B.Tech ECE | CGPA: 7.60

2023 – 2027

S.S College Jehanabad – Intermediate | 74% | **Kainat International School** – Matriculation | 79%

2022 | 2020
