

MD SAMEER AHMAD

mohammadsameerahmad2005@gmail.com | 9155649575 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [GFG](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and shipping production-grade web applications, microservices architectures, REST APIs, and AI-integrated platforms. Proficient in **Java, Python, Node.js, React.js, Spring Boot, MongoDB, PostgreSQL, and Docker**. Delivered multiple end-to-end freelance products serving real users — from system design to deployment on **AWS EC2, AWS Amplify, and Firebase**. Strong CS fundamentals — DSA, OOP, DBMS, and backend system design concepts. 400+ problems solved on LeetCode & GFG.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, Dart, SQL, Bash

Frontend: React.js, Next.js, Flutter (BLoC), Redux, Tailwind CSS, Bootstrap, i18n

Backend: Spring Boot, Node.js, Express.js, REST APIs, Microservices, API Gateway, Kafka

Database & Cache: MongoDB, PostgreSQL, MySQL

Cloud & DevOps: AWS (EC2, Amplify), Firebase, Docker, Git, GitHub, CI/CD, Maven

Security: JWT, Spring Security, BCrypt, RBAC, OTP Auth

WORK EXPERIENCE

JPMorgan Chase & Co. – Software Engineering Virtual Experience (Forage) [Cert] October 2025

- Explored **REST API integration** and basic Kafka-based event messaging through hands-on software engineering simulation tasks
- Participated in **backend workflow implementation** and collaborative code review activities in a practical development environment

AI-ML Virtual Internship | AICTE EduSkills & AWS Academy [Cert] April – June 2025

- Worked on **AI/ML fundamentals, Python-based data processing**, and cloud-based ML workflow concepts through hands-on virtual internship tasks
- Gained exposure to **machine learning pipelines, data preprocessing**, and basic AWS cloud integration for AI applications

PROJECTS

Freelance – MLM Microservices Platform [GitHub](#) | [Live](#)

Node.js, Express.js, React.js, MongoDB, Docker, JWT, API Gateway, Microservices

- Designed **scalable microservices architecture** with API Gateway; engineered binary referral tree with dynamic user placement, spillover logic, and hierarchical relationship tracking
- Built **automated commission distribution engine** triggered by financial events; enabled real-time inter-service communication between wallet and income modules via event-driven flow
- Developed **wallet & transaction services** (top-up, withdrawal, balance validation) with full audit trail; implemented JWT + RBAC auth with BCrypt hashing and Dockerized deployment — **250+ active users**

Freelance – Gramflix | Referral & Wallet System [GitHub](#) | [Live](#)

Java, Spring Boot, React.js, MongoDB, Docker, JWT, Spring Security, AWS EC2, AWS Amplify

- Designed **multi-tier referral & earning engine** (+5/+20/+200 bonus logic) with real-time wallet crediting, parent-child linking, and milestone tracking via Spring Boot service layer
- Built **JWT + Spring Security** stateless auth with OTP (MSG91), BCrypt, and RBAC; digital wallet with credit/debit, withdrawal pipeline, admin approval, and MongoDB audit trail — **180+ active users**
- Backend Dockerized on **AWS EC2**, frontend on **AWS Amplify**; controller-service-repository pattern with testable REST APIs and clean Git PR workflow

Freelance – Madarsa Arabia Organizational Website [GitHub](#) | [Live](#)

React.js, Tailwind CSS, i18n, AWS Amplify, Git

- Built **scalable multilingual architecture (i18n)**; delivered fully responsive production website on AWS Amplify serving **300+ active students**
- Integrated real-time notice/update system and WhatsApp Click-to-Chat; clean component-based React architecture with optimized performance across all devices
- Sole developer — handled full stack: UI design, frontend engineering, deployment pipeline, and client communication end-to-end

AI-Driven Decision Intelligence Platform [GitHub](#) | [Live](#) | [APK](#)

Python, Flask, Flutter, LangChain, LLMs, RAG, PostgreSQL, AWS EC2, Firebase, Groq API

- Built **AI-powered decision intelligence platform** using LangChain, REST APIs, and LLMs including Mistral and Qwen for forecasting insights, AI chat, document understanding, and recommendation workflows
- Designed **modular backend workflows** integrating Groq API-based inference for live deployment and locally tested open-source models on Google Colab for experimentation and flexible AI-driven analysis
- Designed full-stack architecture: **JWT-secured REST APIs and Flutter BLoC mobile & web frontend** — complete end-to-end ownership from system design to production

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL IIT Kharagpur – Java | Elite** [Link](#) | **NPTEL IIT Madras – Database Systems** [Link](#)
- 3× Adobe Hackathon Participant** [Cert](#) | Solved **400+ DSA problems** across LeetCode & GFG |
- 120+ day active streak** on LeetCode & GFG — consistently solving Problem of the Day on both platforms

EDUCATION

JIS College of Engineering – B.Tech ECE | CGPA: 7.63 2023 – 2027

S.S College Jehanabad – Intermediate | 74% | Kainat International School – Matriculation | 79% 2022 | 2020
